How to use these outlines

Pages 1 to 7 are full page outlines. Page 8 has six small trees.

Print

- Print at 100 percent on US Letter. In the print box, choose Actual size, not Fit to page.
- A4 paper works too. Choose Actual size and the tree will still fit.
- For a smaller tree, print at 50 percent. A full page tree about 8 inches tall becomes about 4 inches.

Color or trace

- Regular printer paper is fine for coloring. Use cardstock if you will paint or glue.
- To trace, tape the page to a window with a blank sheet over it.

Cut

- Cut on the black line. For a stencil, cut the inside out and keep the paper with the hole.
- Let an adult cut with a craft knife. Children can use child safe scissors.

Age tips

- Ages 2 to 4: the simple triangle or the baubles page.
- Ages 5 to 8: the tiered, tall and potted trees.
- Ages 9 and up: the scalloped and zigzag trees.
- Under 3: skip beads, buttons and pom poms. Use stickers only with an adult watching.

Free use

- Free for your family, classroom or child care group. Please do not resell, repost or upload the file.
